

PERFORATED CEILING DIFFUSERS SQUARE, 'LAY-IN', WITH REMOVABLE, PERFORATED FACE-PLATE

PED TYPE

Perforated ceiling diffusers

Square, 'lay-in', with removable, perforated face-plate

✓ Return

Application

- Types PED.O4 square ceiling diffusers with removable, perforated face-plate are designed for (easy) installation in suspended T-bar type ceiling applications and are suitable for return or exhaust air applications. These diffusers have the same appearance as their corresponding supply diffusers type PBD..O4, however without deflection disc.

Technical information

Features:

- Low sound level at high air volume.
- Lay-in design allows quick/easy installation on site in most T-bar suspended ceiling systems.
- Removable face-plate to simplify maintenance and access to air pattern adjustment blades and volume control without opening the ceiling.

Construction:

- Lay-in panel: sheet steel with integral removable perforated face-plate.
- Standard finish: no. 4 white stove enamelled, RAL 9010.
- Plenum box: (option) galvanized sheet steel with or without internal thermal or acoustic insulation.
- Diffuser types PEDO1O4 en PEDO3O4 are also available with lowered plenum box.
- Non standard type available upon request.

Delivery format:

- Diffuser and plenum box are supplied as a single assembly, packed in a carton box to minimize damage during shipping and storage at site.

Assembly:

- The diffuser and the combination of diffuser and plenum box are provided with holes for suspension.

Regular types

- PEDO1O4: ceiling diffuser with removable perforated face-plate.
- PEDO5O4: ceiling diffuser with adaptor.

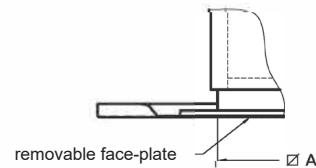

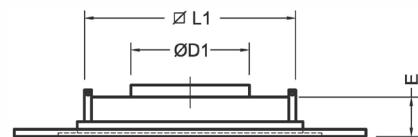

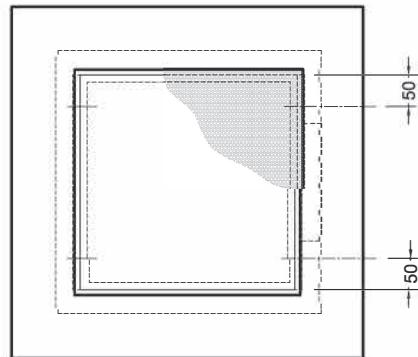

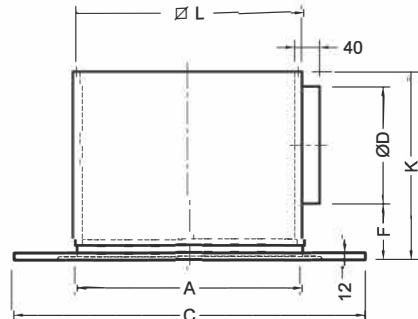

Specify as

Example:

Supply square, return air ceiling diffusers with lay-in panel with integral removable perforated face-plate and appearance to match the corresponding supply air diffusers. Complete with uninsulated plenum box from galvanized sheet steel and volume control damper. Finish, white stove enamelled, RAL 9010.

Barcol-Air type: PEDO1O4

Sizes and arrangements as shown on the plants.

Detail PEDO.O4

Dimensions

| Model | A | Ø C | Ø D | Ø D1 | E | F | K | K _{vl} | Ø L | Ø L1 |
|-------------|-----|-----|-----|------|----|-----|-----|-----------------|-----|------|
| 610 | 234 | 594 | 123 | 158 | 49 | 78 | 226 | 181 | 240 | 210 |
| 812 | 279 | 594 | 158 | 198 | 58 | 87 | 270 | 210 | 285 | 255 |
| 1016 | 381 | 594 | 198 | 248 | 64 | 93 | 316 | 241 | 387 | 357 |
| 1220 | 482 | 594 | 198 | 313 | 77 | 106 | 329 | 254 | 489 | 459 |

Other dimensions are available on request.

Notes dimensions:

1. All dimensions are in millimetres
2. The plenum box is provided with 4 or 6 holes for suspension. The location is indicated by centre lines on the bottom view
3. $K_{vl} = K_{lowered}$ = lowered plenum box.
A lowered plenum box will be executed with an oval pressed spigot. The circumference of the oval pressed spigot is equal to the original pressed spigot diameter ($\varnothing D$). The height of the plenum box is indicated in the size chart.

Square, 'lay-in', with removable, perforated face-plate

1. The stated LpA values are based on a room absorption of 10dB.

2. Sound pressure levels below NC 20 are indicated by “--”.

3. For non standard diffusers, we recommend to contact our technical staff.
